3. Gosline will finish up the TreeCityUSA application to day.

4. Water harvesting plan. After discussion the committee revised the plan to include a cister at the SE corner of the Community Center which will collect water by having gutters along one or two sides of the committee center roof, and to construct french drains along the Nogles Ave side. The committee discussed the work day planned for 01/11/14. Tirion will lead her first workshop on that day. Plans were made to require volunteers for the day, for the pot luck and to prepare the needed materials. We will recommend the Town apply for a Patagonia Regional Community Foundation for the cister as well as for benches.
